

Frankfort Township to Launch Smartphone App as Free Tool for Residents

Frankfort Township is pleased to announce the launch of the official Frankfort Township Smartphone Application. This free, interactive tool allows residents to access information about key Township services, share input, and stay connected with the community.

The app includes directories of Township departments, elected officials, and Quick Links to area organizations and resources. The app's touch-to-add calendar gives residents the ability to add events directly to their personal calendar, and detailed directories for the Township Assessor, Road District, and Animal Control Officer allow residents to contact those departments directly.

Additionally, the app allows users to submit a service request directly to the Township. Tree down? Lost pet? Report it using the smartphone app, complete with the issue's GPS location and a photo.

"We wanted to go beyond the basics, and create a comprehensive tool for our residents. The Frankfort Township Smartphone App allows our people to really connect – they can send in questions, keep track of current events, and report issues," says Township Supervisor Jim Moustis.

The Frankfort Township app is available for both Apple and Android devices, including tablets. To download, go to iTunes or Google Play and search "Frankfort Township".
